- Open-Vaned Rotor Kits
- 16 x 25
- 18 x 33
- Auxiliary Feeders
- Augers
- Feeder Parts

ON-THE-SHELF STANDARD SIZES • CUSTOM SIZES • KITS • REBUILDING

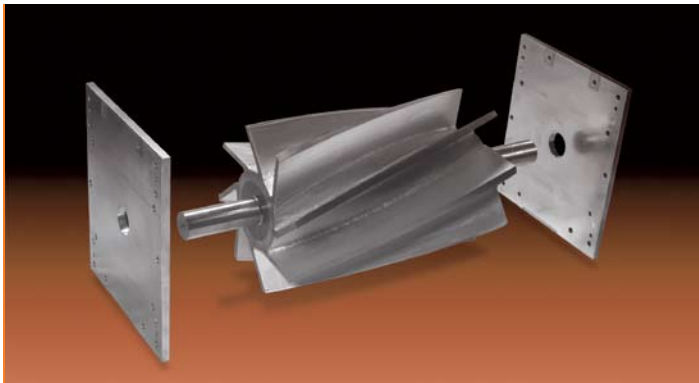

Precision Machine and Manufacturing is your best source for new feeders and feeder parts. We've been manufacturing the highest-quality rotary feeders for 30 years and have 20 years of experience working with blower truck OEMs.

We maintain an on-the-shelf inventory to quickly respond to your feeder parts and equipment needs and will promptly solve your problems, whether you need a complete replacement feeder or just a few feeder repair parts.

We can also completely remanufacture your 16x25, 18x33 or Series 3 fabricated feeder to like-new condition at a substantially less than the cost of a new unit.

If you have experienced packing problems using certain kinds of media in your Series 4 or Series 5 feeder, our open-vaned rotor kit may be extremely effective in keeping your truck operating.

OPEN-VANED ROTOR KIT

BUILT PRECISELY FOR MAXIMUM UPTIME™

There are rotary valves, feeders, or screw conveyors that are priced less than Precision, but none that make you more efficient, more productive, or more profitable. For moving virtually any dry, granular or powdery material smoothly in measured amounts, nothing performs better. The built-in quality of the materials and finishes we use easily handles abrasive substances like fly ash, coal, coke, volcanic cinders, diatomaceous earth and pebble lime. All designs are available in left- or right-hand flow directions. All machining, welding, and manufacturing services are performed in the USA.

We've been designing and manufacturing smarter products of unmatched value for over 30 years. Our innovative engineering department and skilled craftspeople work with customers to create unique solutions that give them a competitive edge by increasing throughput, improving efficiency, and maximizing uptime. Are you pushing productivity? We can help. Call us.
